SYNTHETIC MEDICAL RECORD - TRAINING EXAMPLE

Patient: Alex Example (fictional) Record date: 14 March 2024

GP REVIEW

Alex reports a dry cough and mild fever for three days. No shortness of breath or chest pain.

Temperature 38.1 C; oxygen saturation 98% on room air. Chest clear on examination.

Assessment: likely viral upper respiratory infection. No antibiotics prescribed.

Advice: rest, fluids and paracetamol as needed. Seek review if breathing worsens or fever persists beyond five days. Fit note issued for two days.

End of synthetic note.
